

Xactimate What's New Training – Course Summary (Virtual Classroom)

Course Overview

This course provides engaging, interactive training that students can participate in from the convenience of their home or office. The Xactimate What's New course is designed for users who have been using Xactimate 28 and want to better understand the updates released for the newest version of Xactimate.

Students will review product feature updates and learn to navigate the new design and layout. Ultimately, students will understand the differences between Xactimate 28 and the newest version of the product.

Course Prerequisites

Students will need the following:

- System Requirements
 - High-speed Internet with Internet Explorer
 - Laptop with the NEW Xactimate installed, with external mouse
 - Telephone with headset or hands-free capability in close proximity to a computer
- Computer Skills
 - Comfortable accessing and navigating the Internet
 - Comfortable navigating Windows and other installed computer software
- Understand the property loss industry and terminology

Course Environment

This virtual course is a two-hour, instructor-led web training session. Presentation and discussion are directed by a Certified Xactware Trainer. Students view the presentation via web conference and participate using their phone.

Skills and Objectives

Students will learn:

- How to install the newest version of Xactimate and setup a new instance
- How to migrate files from Xactimate 28 to the new version
- How to navigate the new version of the Xactimate dashboard
- The differences between Xactimate 28 and the newest version
