Date of Report: February 7, 2019 12:33 CST

Claim Details:
- Property Address: 1390 S Cooper St, Arlington, TX, ZIP Code: 76013
- Claim Number: 99999
- Date of Loss: 3/22/16
- Cause of Loss: Assignment Date: Report Period: 01 Jan 2009 - Present

Agent/Adjuster Name: Company: Safe Haven
- Address:
- Phone: cshepard@verisk.com
- Email:
- Latitude: 32.722228
- Longitude: -97.115173

Summary: Hail greater than 0.75" did not occur at the address on the date inquired.
There was 1.75" diameter hail on March 17, 2016; i.e. 5 days before the reported date of loss.

For most severe hail (1/1/09 to today):
- Date: 17-Mar-16
- Est. Hail Size: 1.75
- Est. Hail Prob. (%): 90
- Est. Wind Speed (mph): 95

** Additional hail events occurred at the location prior to the earliest event shown and after the latest event shown.
** If additional history is needed, please contact BenchmarkReport-Request@verisk.com.

All values reflect the maximum value on the calendar day. Hail probability indicates likelihood that hail > 0.75" fell on that day. A significant hail event is defined by 0.75" diameter hail or greater. The most severe hail event date is determined by hail size at a one mile radius around the property location.

### Benchmark® Weather History Reports

Benchmark® data has been demonstrated to align with the occurrence of severe weather. We regularly review its accuracy and calibrate our algorithms using industry claims data to maximize performance. Benchmark processes high resolution hail, wind, precipitation and reflectivity radar data using numerical models and proprietary algorithms developed by our advanced- degreed meteorologists and scientists. We ingest data from the WSR-88D radar network using the dual polarization capability to derive the most accurate representation of the weather. At Verisk, we create hazard indexes that specifically pertain to the insurance industry and their service partners.

Verisk provides software, data, and analytics for enterprise climate risk management. Insurers can apply these solutions to help improve customer service, achieve more accurate risk selection, and reduce claims cycle time. Manufacturers, distributors, and retailers rely on Verisk to accelerate revenue growth through more accurate forecasts of product demand and to promote stable operations by helping mitigate supply chain risk. Our analyses and results draw on disaster risk models from AIR Worldwide®, vertically integrated data from Verisk Analytics, and environmental data and expertise from Atmospheric and Environmental Research (AER®).
